

807 NEXT BC Lithium

Vertical dry vacuum cleaners with batteries

Dry vacuum cleaner where compactness and high-level technical specifications merge to create a new battery-powered model that exceeds the performance of its predecessors. The motor head, designed to ensure maximum quietness,

houses the powerful brushless motor, which delivers high cleaning performance.

The ergonomic and durable handle, practical accessory holders, the protective bumper, and the trolley with front swivel wheels and fixed rear wheels make the 807 NEXT extremely manoeuvrable. The dual hose coupling system, designed to ensure optimal suction performance during use, combined with the special release mechanism on the hose connector for easy one-handed disconnection, delivers high performance and maximum convenience. The vacuum cleaner boasts two different suction power settings, selectable according to need: Eco mode, designed to reduce energy consumption without compromising cleaning effectiveness, and Boost mode, ideal for tackling the most stubborn dirt.

The 807 NEXT BC Lithium is powered by CAS (Cordless Alliance System) batteries, which offer versatility, great reliability and high-level performance: up to 50 minutes of runtime and fast charging in just over an hour.
