

DBP 4

DBP 4

Compact, lightweight, ergonomic and durable solids vacuum. It is worn like a backpack, leaving the hands free and offering maximum freedom of movement during cleaning operations.

High filtering capacity with three filters supplied as standard: fleece filter + cloth filter + cartridge filter, even higher with the optional HEPA filter.

The version with cable has a switch directly built into the belt to switch the machine on and off, ensuring convenience and practicality while working.

The battery-operated models have two different extraction intensities and are powered by CAS (Cordless Alliance System) batteries, which are extremely resistant to shocks and drops, offering versatility, great reliability and excellent performance.

Robustness and manageability

This vacuum cleaner is characterised by its high strength and robustness and, at the same time, its extreme practicality and convenience.

The plastic materials, the shoulder straps, the carrying handle, all parts of this machine have been designed to ensure maximum sturdiness and reliability and are made of high-quality materials. When worn, DBP 4 allows the operator to carry out the main cleaning tasks with great freedom of movement and with everything needed on hand thanks to the shoulder straps and belt, which, in addition to being extremely ergonomic, also serve as accessory holders.

High professional performance

The vacuum cleaner is equipped with a powerful new-generation brushless motor that guarantees excellent performance.

High filtering capacity thanks to the machine's extensive filter set: 3.3 litre fleece bag, cloth filter with a filter surface area of 0.1 m² and cartridge filter with a filter surface area of 0.42 m².

DBP 4 and DBP 4 FLY

Two models equipped with high-visibility, 15-metre-long detachable cable with a double strain relief system. Simple and immediate control of the machine, thanks to the remote control built into the belt, and additional space to store the accessories needed for cleaning operations, thanks to the accessory compartment on the side of the vacuum cleaner. The FLY version is specifically designed to work on board aircraft stationed on the ground.

DBP 4 BC LITHIUM/SWIFT

The BC Lithium model is supplied with two 18V 5.5Ah lithium batteries, complete with charge level indicator, providing up to 45 minutes of working time and a quick recharge in just over 40 minutes. The BC Lithium Swift model, on the other hand, is equipped with two 18V 4Ah lithium batteries, also equipped with a charge level indicator, which guarantee working autonomy of up to 35 minutes and equally fast charging times. CAS represents the most important collaboration between manufacturers of battery-powered tools and machinery, which has resulted in a system that allows batteries and universal chargers to be combined on machines of different types. DBP 4 BC Lithium/Swift is also able to tackle even the most stubborn dirt thanks to its Boost mode, which increases the suction intensity and can be easily activated from the remote control built into the belt.
