

WSD 50 D 60 CHEM

Walk behind scrubber dryers WSD 50 SERIES - with TRACTION

WSD 50 D 60 CHEM is a walk-behind scrubber-dryer, designed for cleaning operations in medium to large environments. With a capacity of 50 litres, a 600 mm washing track and a suction width of 750 mm, it offers an hourly output of 3050 m²/h. The powerful, high-efficiency suction motor guarantees excellent performance with low energy consumption, while the ergonomic handle and the practical Touch System with integrated dual sensors allow precise control of the machine, making every work session easier and more comfortable. WSD 50 D 60 is designed to simplify all day-to-day maintenance operations: the recovery tank has a large opening for easy inspection and cleaning, the easily removable debris tray allows for quick residue management and the brush release function is automatic. Relevant features of the machine include the Silent Mode function, ideal for cleaning in sensitive environments thanks to reduced noise levels, and the ECO System, which optimises consumption without compromising washing efficiency. The Chemical Mixing System, the detergent dispensing and dosing system, completes the standard equipment. WSD 50 D 60 is available in three configurations: a basic version and two full package versions, BC CHEM and BC Lithium CHEM, complete with batteries and charger. The BC version offers a running time of approximately 3 hours, while the BC Lithium CHEM version offers an even longer duration, with the possibility of quick recharging even during short breaks, for the best operational flexibility.
